

Wiring instruction for LED tubes with single-ended input

1. Common wiring diagram of LED tubes with single-ended input (fig. 1):

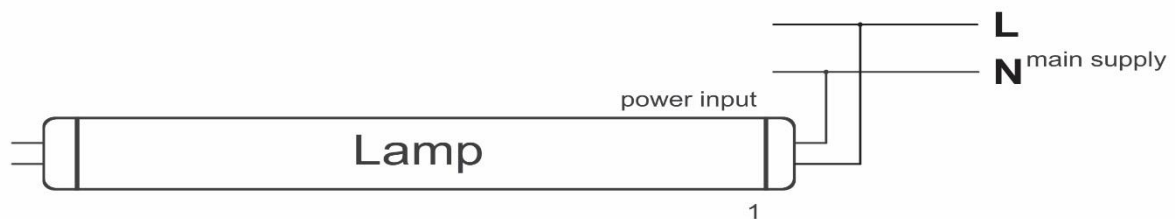

Fig.1

2. For retrofitting of T8 fluorescent lighting fixtures with magnetic or electronic ballast, please, follow the instructions:

- a) The rework must be performed by qualified electricians only, at disconnected supply voltage.
- b) Remove the magnetic ballast and the starter.
- b) Remove the electronic ballast.
- r) Rewire the lighting fixture, as the input is in the one end of the LED tube, as shown in the circuit diagram as follows (Fig. 2):

Fig. 2

E) Replacement of fluorescent tube with a new LED tube (Fig. 3):
